PARENTS DON'T ACCUSE YOUR CHILD OF BEING LAZY

Ninety-Nine Cases Out of a Hundred It is Sick—Something is Sapping the Life Blood

Have you hook worms? Yes, you may if you ever had ground itch. It is estimated by leading physicians, who have investigated the subject, that some country districts in Florida, where the land is sandy, that eighty-five per cent of the children have hook worms tugging away, day and night, at their vitals. If your child is pale and bloodless, with no energy, don't accuse it of being lazy. It is sick! Probably thousands of those parasites are sapping the life blood and making a dwarf of what otherwise would be strong and healthy boy or girl.

You may try to shift the responsibility but you cannot do it, since it is so easy for you to get the information that will free them from this dreadful disease without any cost to you. Once you understand the nature of hook worm disease, you can treat it yourself.

Write at once for "Booklet N" which contains the real scientific facts taken from the bulletins issued from the office of the State Board of Health and from Dr. Stiles reports, who is a recognized authority for the world on hook worm disease. In fact, a complete history of the hook worm and hook worm disease, its effect upon the human system and on society and how to treat it yourself. This booklet will be sent to any address free of charge. It should be in every home in the South. Write today. Lock box 322, Tampa, Fla., and ask for "Booklet N." It is free.

Notice of Final Discharge.

Six months after date, as Executor of the estate of Cornelia D. Goodwin, deceased, I will present to the County Judge of Putnam County, Florida, my final account and vouchers, and then ask for a final discharge as executor of said estate. E. S. CRILL, April 27th, 1910. Executor.

Notice of Application for Tax Deed. Notice is hereby given that Rodman Lumber Co., purchaser of tax certificate No. 323, dated the 3rd day of July, A. D. 1899, has filed said certificate in my office, and has made application for tax deed to issue in accordance with law. Said certificate embraces the following described property situated in Putnam county, Florida, to-wit:

W $\frac{1}{2}$ of w $\frac{1}{2}$ of s $\frac{1}{2}$ of s $\frac{1}{2}$ of section 2, township 10 s., range 24 e.; 10 acres. The said land being assessed at the date of the issuance of such certificate in the name of C. G. Green.

Unless said certificate shall be redeemed according to law, tax deed will issue thereon on the 4th day of Sept., A. D. 1910.

Witness my official signature and seal this 5th day of August, A. D. 1910.

[Seal] HENRY HUTCHINSON, Clerk circuit court, Putnam county, Fla. By H. Hutchinson, Jr., D. C.

FOR SALE! Nice residence on north 3rd Street. Close in—good large lot—City Hall block. Cash or terms. H. M. DE MONTMOLIN.

Chamberlain's Cough Remedy Cures Colds, Croup and Whooping Cough.

GIGANTIC STEAL IS LAID TO OFFICIALS

Illinois Central Unearths Big Graft Conspiracy.

ROAD LOST MILLION DOLLARS

Frank B. Harriman, Former General Manager; Charles L. Ewing and John M. Taylor Named in Warrants—Other Arrests to Follow—Startling Allegations of Graft.

Three former executive officers of the Illinois Central Company have been arrested on warrants in connection with the alleged frauds by means of which the railroad was defrauded. It is said, of \$1,000,000.

The men arrested were:

Frank B. Harriman, formerly general manager of the road.

Charles L. Ewing, formerly manager of lines north of the Ohio river.

John M. Taylor, formerly general storekeeper of the road.

The warrants sworn to by T. J. Harahan, president of the Illinois Central, charge the three men with conspiracy to cheat and defraud the railroad by false pretenses and with operating a confidence game. Harriman and Ewing were taken to the Harrison street police station. Their bonds of \$10,000 each were signed by a professional bondsman.

The allegations in the graft case are startling. The investigation began a year ago. It reached a crisis last spring when President Harahan began actions to recover sums said to aggregate more than \$1,000,000 alleged to have been taken from the road by a car repair company in connivance with high officials of the road.

Harriman, Ewing, Taylor and many others of less magnitude resigned their positions.

SPINDLES TO BE IDLE.

Fully 50,000 Operatives Are to Be Thrown Out of Work.

Millions of spindles in the cotton mills of the country will be idle for periods varying from one week to 16 days during the latter part of this month and the first half of September. Mills in New England employing 50,000 operatives have already posted notices announcing a further curtailment and it is understood that similar action will be taken by many other concerns.

In the southern states more than 3,000,000 spindles will be idle one week in September.

A short time policy among numerous cotton plants in New England will be continued during September, according to the present outlook.

ANIMALS THAT WEEP.

Dugong Tears Preserved by the Malays as a Love Charm.

While the act of laughing may be peculiar to man, the same is not true of weeping, which, if we are to accept the testimony of a French naturalist, is a manifestation of emotion that is met with in divers animals.

It is said that the creatures that weep most easily are the ruminants, with whom the act is so well known that it has given rise to trivial but accurate expression, "to weep like a calf." All hunters know that the stag weeps, and we are also told that the bear sheds tears when it comes to a consciousness of its last hour. The giraffe is not less sensitive and regards with tearful eyes the hunter who has wounded it. This animal also weeps through downright nostalgia. Dogs also are held to be lachrymose, and the same holds in the case of certain monkeys. Sparrmann states the elephant sheds tears when wounded or when it perceives that it cannot escape.

Aquatic animals, too, it appears, are able to weep. Thus, many authorities agree, dolphins at the moment of death draw deep sighs and shed tears abundantly. A young female seal was observed to weep when teased by a sailor. St. Hilaire and Cuvier report, on the authority of the Malays, that when a young dugong is captured the mother is sure to be taken also. The little ones then cry out and shed tears. These tears are collected with great care by the Malays and are preserved as a charm that is certain to render a lover's affection lasting.—New York Press.

A PROPHETIC JEWEL.

Peculiar Ring That Was Owned by Marquise du Barry.

Marquise du Barry, whose lovely head fell into the basket beneath the guillotine in explanation of her levity, extravagance and folly, had in her possession a stone of which the Paris jewellers were unable to tell the precise nature.

There appeared upon it below the surface and as if under water an outline of a picture containing human figures. Strange to relate, when first the gem was given to its afterward unfortunate possessor this outline was not clear, but after it had been some months in her possession it grew more vivid.

One day the negro servant boy, Lamour, who was afterward instrumental from revenge in the downfall of the Du Barry, declared, looking at the jewel, that he could decipher the figure of a woman with disheveled hair leaning before a scaffold and surrounded by a crowd, while beside her stood the executioner.

A strange but authenticated circumstance is that the negro servant boy precisely described the guillotine. Dr. Guillotine had not then invented his celebrated instrument of death, nor had the horrors of the revolution begun.

Snatching the jewel from the hand of the servant, Mme. du Barry examined it, saw the kneeling woman, the angry crowd, the death knife falling and, with a cry of agony, fell senseless to the floor.

GOVERNOR HASKELL.

Oklahoma May Send Him to United States Senate.

ROOSEVELT AND NEW YORK.

Former President Says He'll Take No Part in State Campaign.

A dispatch from New York says: Colonel Roosevelt made it clear to his friends that the reports to the effect that he did not intend to take any part in the coming state campaign were well based.

As the colonel put it, he did not think he had been encouraged to take an active interest by the action of the state committee in turning down his name for temporary chairman of the convention. His close friends are the authority for the statement that Colonel Roosevelt has never indicated by the slightest word what his intentions are with regard to 1912. The colonel, however, has always said that he reserves the right to engage in any situation at any time, whenever he feels that his policies demand it.

FATAL BOAT EXCURSION.

One Killed and Three Injured in Disaster at Lake Charles, La.

Pauline Woodring, 6-year-old daughter of T. S. Woodring, a prominent lumber man, died as a result of injuries received in the motor boat explosion in the Calcasieu river. P. O. Moss and Lotis Swan, secretary and treasurer, respectively, of the Lake Charles Railway, Light and Water Company, who were also injured in the explosion, are in a critical condition.

Mrs. J. A. Landry, wife of the president of the same company, was seriously burned, but will recover. Ten persons were in the boat when the explosion occurred. Six escaped with minor injuries.

GENERAL NOTES.

It was learned at Washington, D. C., that Gustave A. Rist, Jr., the young American who was reported to have been murdered in Bolivia, June 11, was a native of Bloomfield, N. J., where his father now resides. The state department has directed American Minister McCombs at Lima to make a thorough investigation of the alleged murder. Young Rist was a mining engineer, employed in a gold mine near the Bolivia-Peru border. According to a letter received by his father from a fellow-engineer, he was shot in the back by a Spaniard named Vaccara. The motive for the crime has not been disclosed and it is not known whether Rist's slayer has been arrested. Minister Combs, in his dispatch to the state department, gave the name of the alleged murderer as Augustine Hunt.

By a vote of 395 to 88 Democrats of Gadsden, Ala., went on record as in favor of the commission form of municipal government. Gadsden is the third Alabama town to approve this new form of city management. Birmingham and Bessemer having also given handsome majorities in favor of the change. The next session of the legislature will be asked to pass an enabling act. In the Gadsden primary, W. G. Bellinger was nominated for mayor; George S. Vann for president of council.

In the patio of the old mission Church of Our Lady of the Angeles, situated in Original Sonora Town, the 129th anniversary of the founding of Los Angeles was celebrated by representatives of the Spanish population. Gen. Antonio Aguilar, aged 90, who resisted the advance of Fremont, presided over the celebration. He wore the uniform in which he fought the American invaders in 1848 and opened the ball, which ended the festivities, by dancing with a 15-year-old senorita.

The population of Atlanta, according to the United States census report, is 154,839. This is a gain of 64,967 over the census of 1900, or a gain in population of 72.3 per cent.

The population of Canada, March 31, was 7,489,781, according to the estimate of the census department.

A heavy earthquake shock has been felt at Moutiers, France. It lasted 27 seconds.

The Spectroscope.

Originally the spectroscope was applied only to chemistry and in that limited field proved itself an invaluable aid in accurate analysis. By holding in a bunsen flame a platinum wire moistened by contact with the skin the presence of a few grains of salt swallowed a few minutes previously can be detected with the spectroscope. Indeed, so wonderfully refined is the work of the spectroscope chemist that he can discover in a substance the presence of one three-millionth of a grain of metal.

PET DOG EXPOSED GREWSOME CRIME

Unearths Body of Mistress From Shallow Grave.

POLICE AT WORK ON CASE

Sensational Murder Committed on a Ranch in California.—Young German Is Under Suspicion and Is Being Searched For by Detectives as Being Connected With Crime.

A Los Angeles, Cal., dispatch says: While detectives are searching the city, deputies from the sheriff's office are scouring the country for Otto Schultze, the young German wanted in connection with the murder of Mrs. Freida Castine, whose body was unearthed from a shallow grave by a pet dog at her ranch near Lancaster. Some of the police and deputies are inclined to believe that Schultze, with \$6,000 thought to have been stolen from Mrs. Castine, has sought to enter Mexico by way of the Arizona border or through El Paso.

A full description of the fugitive has been telegraphed abroad. According to the description Schultze is between 20 and 25 years of age, five feet, eight inches in height, of medium build, wears a light mustache and has a florid complexion.

A curious feature, following the murder of Mrs. Castine, is the disappearance of Mrs. Martha Chatt, wife of a Los Angeles realty dealer, and her escort, John Inderbotten, while the two were on their way to a ranch near the home of Mrs. Castine. They have been missing for a week and D. C. Chatt, husband, has asked the aid of the sheriff to find his wife.

REVOLUTION NEAR END.

Peace is Drawing for the Troubled Nicaraguans.

That the revolution in Nicaragua is finally nearing an end is indicated in cable reports received in New Orleans from Managua and other Central American points by not only the sympathizers of the revolutionists, but by those of Madriz and agents of commercial organizations and steamship lines as well.

For the first time since the revolution started, advice received by both sides, as well as by disinterested parties, were practically the same. They are to the effect that the Madriz government troops have met with serious reverses almost at the very gate of Managua, the capital city; that Granada had been captured by General Luis Mena with an insurgent army; that the inhabitants of the interior are flocking to the standards of the revolutionists, and that Madriz has been succeeded in the presidency by Jose Estrada, a brother of Juan Estrada, head of the provisional government set up by the insurgents.

Whether Jose Estrada will be permitted to retain the presidency if the revolutionists succeed in taking Managua, appears to be a matter of doubt.

HOOPER NAMED.

Republicans of Tennessee Hold Convention at Nashville.

Captain Benjamin W. Hooper, of Newport, Cooke county, was nominated for governor of Tennessee by the republican state convention which assembled in the Ryman auditorium at Nashville, Tenn.

The name of Alfred A. Taylor, of Washington county, was the only other one presented to the convention and immediately following the announcement of the result of the first ballot the nomination was made unanimous.

The ballot stood, Hooper, 382 9-14; Taylor, 101 5-14. The convention also endorsed the candidacy of B. A. Enloe, independent democrat, for railroad commissioner from west Tennessee.

The independent-state-wide prohibition democrat, who have fought Governor M. R. Patterson every step of his official career, are expected to support the ticket just nominated, as against the regular democratic nominees, which includes Patterson for reelection, and the coming campaign promises to be one of bitterness.

THREW BODY AWAY.

Heartless Conduct of Autoist Who Killed Little Boy at Play.

The police at Mattawan, N. Y., are hunting for some clue to the identity of an automobilist whom they charge with killing the 3-year-old son of George Verdi, a well-to-do farmer.

The child was playing by the roadside when the automobile whizzed by. A projecting bolt caught his clothes and he was dragged beneath the wheels, killing him instantly.

According to the police, the driver stopped his car, picked up the baby's body and threw it over a low fence into a lawn beside the road.

Persons in a cross street, too far away to identify the automobilist, saw him stop his machine, pick something from the road and toss it aside. They thought it was a trifling obstruction of some kind and paid no particular attention. A few moments later the baby's body was found on the lawn.

Easy Way of Measuring Heights.

Anybody who knows how to take the altitude of the sun or a star with a sextant and wishes to take that of any distant hill, steeple or the like should put a tea tray on the ground, fill it with water and then retire from it until the top of the hill, steeple or what not is reflected in the liquid. Now take the sextant and make the image of the summit coincide with its reflection in the liquid. The angle of elevation will thus obviously have been measured double. Half of this will give the measurement required.
